

WORKS

PROFESSIONAL BIO AND APPROACH

Born in Milan in 1979, Annapaola Ramorino is a registered Italian architect. She graduated in 2004 from the Milan Polytechnic with a thesis in industrial architecture in which she explores and deepens the relationship between architecture and branding.

In 2006 she moves to London to work at Foster + Partners where she contributes to several international projects in the residential, educational, commercial and hospitality fields.

Back in Milan in 2009, she starts her collaboration with prestigious interior design studios, including Antonio Citterio Patricia Viel, where she spends an important part of her professional journey, increasing her passion for design and refining her attention to details.

In 2020 she opens her own design consultancy firm.

Her belief is that “every space has a story to tell” and must reflect the values and traits of the client, for both private or business.

Architecture and Design, built around people, have the responsibility to improve the quality of life and the experience of space of the individuals, stimulating the intellect, evoking positive emotions, shaping new virtuous and sustainable habits.

Nata a Milano nel 1979, Annapaola Ramorino è un architetto iscritto all’Ordine degli Architetti di Milano.

Si laurea nel 2004 al Politecnico di Milano con una tesi in architettura industriale nella quale esplora e approfondisce la relazione tra l’architettura produttiva e branding.

Nel 2006 si trasferisce a Londra per lavorare nello studio Foster + Partners dove contribuisce a diversi progetti di respiro internazionale nel campo residenziale, educativo, commerciale e dell’ospitalità.

Tornata a Milano nel 2009, inizia la sua collaborazione con prestigiosi studi di interior design, tra i quali Antonio Citterio Patricia Viel dove trascorre una parte considerevole del suo percorso professionale, accrescendo la sua passione per il design e affinando l’attenzione ai dettagli.

Nel 2020 apre il suo studio di consulenza progettuale.

La sua convinzione è che “ogni spazio ha una storia da raccontare” e deve riflettere i valori e le caratteristiche del cliente, sia esso privato o business.

Architettura e Design, costruiti intorno alle persone, hanno la responsabilità di migliorare la qualità della vita e l’esperienza dello spazio degli individui, stimolando l’intelletto, evocando emozioni positive, plasmando nuove abitudini virtuose e sostenibili.
